Art Unit: 2175

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25-29 and 34, drawn to a method of using an application program interface, classified in class 717, subclass 120. (Note: claim 34 is considered to be an independent method claim).
- II. Claims 30-33, drawn to a modified healthcare system, classified in class 705, subclass 2.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus is a conventional computer system having a user interface. Accordingly, the system can be used in materially different processes associated with a conventional computer system, such as word processing or writing computer programs.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
